

## DDA Digital Imaging Lab

5<sup>th</sup> floor, Myrtle Hall

Prof. Michael O'Rourke

09/29/15 p. 1/1

### General Information

#### Hours

Lab hours are posted on the door of the imaging lab. A DDA graduate assistant student is assigned to the room during those hours. That graduate assistant student must be present in order for you to use the room. The DDA makes an effort to have the Lab staffed as close to all day every day as possible. If you observe problems with grad assistants not being present when they are scheduled to be, bring it to the attention of the DDA office.

#### Papers

The Print Lab officially carries only two papers – Epson Enhanced Matte and Epson Luster. Both are carried as 44" rolls. (Sometimes there are other papers available, but not always.)

Students may use other substrate – paper, canvas, or fabric – that they purchase themselves if those papers are professionally prepared papers for digital printing. Non-digital print papers (watercolor, etc) may not be used. Exception: There is a small printer in the Lab which is intended for experimental papers. For any non-digital paper, the paper must be approved by your instructor, the DDA lab managers, or the grad assistant on duty. Please consult with the instructor about using other substrate.

#### Pricing for printing

Students enrolled in an approved DDA Imaging class are allotted \$50 free printing. Talk with the grad assistant on duty and/or the DDA Assistant to the Chairperson in the DDA office for details about pricing and how to pay for your printing. Once your free allotment is used up, you pay at rates specified by the DDA office. See below.

Paper Size	DDA Paper	Student Paper
8 x 10	\$1	\$1
8.5 x 11	\$1	\$1
13 x 19	\$3	\$2
24 " roll	\$6	\$5
44" roll	\$10	\$7

Students not given a free allotment may also print at the above rates.

#### Instructional Links
